

LEGO STEAM Boat Challenge

Hi from Miss Kelly!

- My son Max (age 8) and Hayden (age 10) decided to take on a Lego STEAM Boat Challenge. We got our idea from: <https://lemonlimeadventures.com/simple-lego-stem-project-design-boat/>
- We watched a video to learn about how ships float on one of our SciShowKids: <https://www.youtube.com/watch?v=CvWrkxzCiaY> We learned about **displacement**
- Then we started building! We put our models to the test? Did they float? How many coins could we add before it sank? How could we fix our designs after?
